hi
i have some problem with ve's i installed cpanel on them!!
about 2 day after ve restart some of vps servicess dont working correct and i get 404 error when i have to login to cpanel/whm
when i reboot the ve all go up and cpanel working well

is there any reason for this? is this a ram ? ve have 512mb of ram and 50% of a pentium D 2.8 cpu!
TNX
