Is it your VPS?

I've asked this question, because addresses 72-55-180-20 and 72.55.180.209 are different. Is it normal?

That route was from the HOST machine. 72.55.180.209 is the VPS. Im not sure what 72.55.180.20 is. Its not one of my addresses.

My HOST IP is 72.55.179.7
