I forgot to add this trivial program which does autobind.

```
#include <sys/socket.h>
#include <sys/un.h>
#include <unistd.h>
#include <errno.h>
#include <string.h>
#include <stdio.h>

int main(int argc, char* argv[])
{
    int fd;
    struct sockaddr_un addr;

    fd = socket(PF_UNIX, SOCK_DGRAM, 0);
    if (fd == -1) {
        perror("socket");
        return 1;
    }

    memset(&addr, 0, sizeof(addr));

    addr.sun_family = AF_UNIX;
    strcpy(addr.sun_path, "");

    if (bind(fd, &addr, sizeof(short))) {
        perror("bind");
        return 1;
    }

    return 0;
}
```
