Hello. I've used to compile my own patched kernel without any problem until stab039. I was trying to recompile the 045.1 but it fails with this error:

```
kernel/pid.c: In function 'free_pid':
kernel/pid.c:197: error: dereferencing pointer to incomplete type
kernel/pid.c: In function 'alloc_pid':
kernel/pid.c:233: error: dereferencing pointer to incomplete type
make[2]: *** [kernel/pid.o] Error 1
make[1]: *** [kernel] Error 2
make[1]: Leaving directory `/usr/src/kernel_c3/linux-2.6.18'
```

Any idea? Thank you
