---

After upgrading to 2.6.18-028stab045 (nfsutils 1.1.0) i get the following when i try to umount a nfs filesystem in a VE:

'nfs' is not a legal NFS export name

```
:/# mount
simfs on / type simfs (rw)
tmpfs on /lib/init/rw type tmpfs (rw,nosuid)
proc on /proc type proc (rw,nosuid,nodev,noexec)
sysfs on /sys type sysfs (rw,nosuid,nodev,noexec)
tmpfs on /dev/shm type tmpfs (rw,nosuid,nodev)
devpts on /dev/pts type devpts (rw,nosuid,noexec)
nfs on <dir> type nfs (rw,noatime,nodiratime,vers=3,rsiz=8192,wsiz=8192,acregmin=60,acdirmin=60,soft,intr,proto=udp,timeo=600,retrans=2,sec=sys,addr=...)
:/# umount <dir>
umount.nfs: 'nfs' is not a legal NFS export name
umount.nfs: 'nfs' is not a legal NFS export name
```

```
:/# more /etc/mstab
simfs / simfs rw 0 0
tmpfs /lib/init/rw tmpfs rw,nosuid 0 0
proc /proc proc rw,nosuid,nodev,noexec 0 0
sysfs /sys sysfs rw,nosuid,nodev,noexec 0 0
tmpfs /dev/shm tmpfs rw,nosuid,nodev 0 0
devpts /dev/pts devpts rw,nosuid,noexec 0 0
nfs <dir> nfs rw,noatime,nodiratime,vers=3,rsiz=8192,wsiz=8192,acregmin=60,acdirmin=60,soft,intr,proto=udp,timeo=600,retrans=2,sec=sys,addr=... 0 0
```

Also when I try to umount a VE with a nfs filesystem mounted in it the HW node hangs (like the old nfs umount bug).

Any ideas?

Thanks  
Alex
