
Subject: Re: Kernel 2.6.18-openvz-13-39.1d1-amd64 oops
Posted by [efball](#) on Wed, 10 Oct 2007 20:04:20 GMT

[View Forum Message](#) <> [Reply to Message](#)

I'm had a similar crash using the latest 686 kernel from
download.openvz.org:
linux-image-2.6.18-openvz-13-39.1d2-686_028.39.1d2_i386.deb

```
vzctl --version  
vzctl version 3.0.11
```

Two boxes are using it, one is fine, the other hung once.
All the logs had was this:

```
Oct 5 19:15:01 penguin /USR/SBIN/CRON[31518]: (root) CMD  
(/usr/share/vzctl/scripts/vpsnetclean)  
Oct 8 10:34:35 penguin syslogd 1.4.1#18: restart.
```

There was some spew on the console, but I didn't know how to capture that.
