Hi "belkhal",

at [download.openvz.org](http://download.openvz.org), there is no linux-image like -bigmem,  
there are still missing,

but the repro at [debian.systs.org](http://debian.systs.org) has the Debian linux kernel image built with the OpenVZ  
enterprise config, read precompiled kernel images at [debian.systs.org](http://debian.systs.org) (dso) at the wiki page of  
Install OpenVZ on Debian.
