Subject: Can not suspend VE: Resource temporarily unavailable
Posted by piavlo on Wed, 17 Oct 2007 11:53:19 GMT

Hi, I can't migrate a VE since i have
lockd process which is seen only inside the VE itself.
If i run ps in HN i can't see this lockd process. Why?
This process is started only if mount nfs filesystem
inside the VE.
If i unmount the nfs filesystems inside VE the migration is ok
How can i make live migration to a VE with nfs mounted filesystems?

```
projsrv1#  vzmigrate --online -r no -v projsrv3 101
OPT:--online
OPT:-r
OPT:-v
OPT:projsrv3
Starting online migration of VE 101 on projsrv3
 * status:  started
   Loading /etc/vz/vz.conf and /etc/vz/conf/101.conf files
   Check IPs on destination node:
Preparing remote node
   Copying config file
101.conf                                             100% 1852     1.8KB/s   00:00
Saved parameters for VE 101
   Creating remote VE root dir
   Creating remote VE private dir
Initializing remote quota
   Quota init
   Turning remote quota on
Syncing private
Live migrating VE
   Suspending VE
Setting up checkpoint...
     suspend...
Can not suspend VE: Resource temporarily unavailable
foreign process 15638/14614(lockd) inside VE (e.g. vzctl enter or vzctl exec).
suspend is impossible now.
