Subject: Re: forcedeth problems with 2.6.18-028stab045.1
Posted by khorenko on Thu, 18 Oct 2007 09:02:40 GMT

Hello Paul,

could you please give me some details?
i've just taken a 2.6.22 mainstream kernel, applied patch-ovz003.2-combined.gz from
http://wiki.openvz.org/Download_kernel_2.6.22 and successfully compiled the kernel with config
kernel-2.6.22-x86_64.config.ovz taken from the same page.
No errors.

Could you please tell me which gcc version and config did you use?

Thank you,

--
Konstantin.
