Hi Konstantin,

Quote:could you please give me some details?

i've just taken a 2.6.22 mainstream kernel, applied patch-ovz003.2-combined.gz from [http://wiki.openvz.org/Download\\_kernel\\_2.6.22](http://wiki.openvz.org/Download_kernel_2.6.22) and successfully compiled the kernel with config kernel-2.6.22-x86\_64.config.ovz taken from the same page.

No errors.

Could you please tell me which gcc version you used?

fox ~ # gcc --version

gcc (GCC) 4.1.2 (Gentoo 4.1.2 p1.0.2)

Copyright (C) 2006 Free Software Foundation, Inc.

Quote:and which config you used?

Hmmm... I just downloaded kernel-2.6.22-x86\_64.config.ovz, used this and the kernel has compiled very nicely. Looks like you hit the nail on the head - Sorry! (FX: Sheepish grin)

In your opinion, how close to release is the 2.6.22 branch?

Best Regards, Paul.
