i try to start (fedora 5) user

Starting VPS ...
VPS is unmounted
VPS is mounted
Adding IP address(es): 192.168.1.45
FATAL: kernel too old
Setting CPU units: 1000
Set hostname: hello.com
FATAL: kernel too old
VPS start in progress...
FATAL: kernel too old

My kernel 2.6.8-022stab072.2-enterprise
