I downloaded this:

<http://download.openvz.org/kernel/branches/2.6.18/028stab045.1/patches/patch-ovz028stab045.1-combined.gz>

and applied it to clean 2.6.18 (not 2.6.18.8, as previous patch had such requirement)

> 2. plz attach your config so that we could check onsite.
attached
