I haven't tried the bridging setup but I believe that "snowdeal" was able to make it run - take a look at http://forum.openvz.org/index.php?t=msg&goto=1761&&srch=dummy0+openvpn#msg_1761 .

Shouldn't routing show actually better performance than bridging? That's at least how they say it on the openvpn website. I haven't tested the performance as I've been focusing on making it work and my Internet connection has been of low quality lately so it's not easy to do any speedtests etc.
