tomas,

I followed your howto, and I have success in connecting, but I can't get to my main network.. On my client side, it gives me:

Fri Oct 26 13:40:16 2007 route ADD 192.168.0.0 MASK 255.255.255.0 192.168.201.1
Fri Oct 26 13:40:16 2007 Warning: route gateway is not reachable on any active network adapters: 192.168.201.1
Fri Oct 26 13:40:16 2007 Route addition via IPAPI failed
Fri Oct 26 13:40:16 2007 route ADD 192.168.201.0 MASK 255.255.255.0 192.168.201.1
Fri Oct 26 13:40:16 2007 Warning: route gateway is not reachable on any active network adapters: 192.168.201.1
Fri Oct 26 13:40:16 2007 Route addition via IPAPI failed

My main network is 192.168.0.0/24
My "routed" network is 192.168.201.0/24

I tried to ping 192.168.201.1 from my client and still couldn't reach it..

I commented out the push redirect-gateway per your suggestion..
