Subject: Using the same IP as VPS0 (HOST)
Posted by dearaujo on Mon, 27 Mar 2006 19:43:44 GMT

After playing with Vservers, I know that I can assign a guest the same IP address as the host. Can you do the same with an OpenVZ VPS?

If so, how do I go about it? I can't seem to get it to work (which makes me believe a VPS _really_ can't have the same IP address as the host)

Thanks for the help.
