Thanks for the suggestion. I had to do that to get Gutsy to work. I followed the instruction from [http://wiki.vpslink.com/index.php?title=HOWTO:_Fix_Missing_ubuntu-minimal_dependencies_for_Ubuntu_6.10_\(Edgy_Eft\)](http://wiki.vpslink.com/index.php?title=HOWTO:_Fix_Missing_ubuntu-minimal_dependencies_for_Ubuntu_6.10_(Edgy_Eft)) to make a dummy upstart package, and the Gutsy VE now starts fine.
