Hi maratrus, this is my lsof output (extrange but real :S)

root@anuncios:/# Isof |grep delete

root@anuncios:/#

If I just do Isof it show a lot of files but If I do a grep delete it don't show nothing.

this is my uname -a output:

root@anuncios:/# uname -a Linux anuncios.jornada.com.mx 2.6.18+openvz #1 SMP Thu Aug 9 14:38:45 CDT 2007 x86\_64 GNU/Linux

root@anuncios:/#

My version of vzctl its 3.0.11-13 server virtualization solution - control tools

I tried the vzguota drop 104 but it do this:

root@gribus:~# vzctl stop 104

Stopping VPS ... VPS was stopped

VPS is not mounted

root@gribus:~# vzquota drop 104

vzguota: (warning) Quota is running for id 104

root@gribus:~# vzctl start 104

Starting VPS ...

vzquota: (warning) Quota is running for id 104 already

VPS is mounted

Adding IP address(es): 132.248.10.53

Setting CPU limit: 10 Setting CPU units: 1000

Set hostname: anuncios.jornada.com.mx

File resolv.conf was modified Setting quota ugidlimit: 100 VPS start in progress...

root@gribus:~#

any way if you want it I wait 3 days to do the lsof and paste it here. Really man, tnks for your time and wish of help to others.
