I managed to solve the problem:

Quote:# su root -c "cat /proc/user_beancounters"

Version: 2.5

uid	resource	held	maxheld	barrier	limit	failcnt
33189:	kmemsize	4542834	5069947	12582912		14680064
	0					
	lockedpages	255	255	344	344	189
	privvmpages	49055	50262	65536	67072	

142

I had to change every appearance of myid to uid, and rename the symlinks from *_001 to *_33189

```
mv /etc/munin/plugins/vebc_numfile_privvmpages_lockedpages_001
/etc/munin/plugins/vebc_numfile_privvmpages_lockedpages_33189
```

```
# /etc/munin/plugins/vebc_numfile_privvmpages_lockedpages_33189 config
```

```
graph_title beancounter for VE33189: numfile privvmpages lockedpages
```

```
