neotic wrote on Tue, 06 November 2007 11:08 Which IP do you suggest I use for the bridge?  
The ip of the HN of course.

But why are you putting all your Virtual Servers on the same HN?

Do you intend to migrate the VEs between different HNs?

Quote: And yes, I've gotten LVS to work several times before, not on OpenVZ though.

Just wanted to make shure the prob is OpenVZ related.
