Yup. Team work will give us a chance to get in to the 2.6.25 with the core virtualization. By core I mean unix, netlinux, ipv4 and ipv6.

Netfilters virtualization is a complex task :)

Well, actually we have almost moved to the net-2.6 with the ipv4

set. There are only some minor (I hope they are minor ;)) things.

So we would be glad to go on with ipv4 further. What's up with the

ipv6 patches, Daniel? You said that you and Benjamin make some

big progress in this area, no?

Thanks,

Pavel
