oh, the apache server isn't on the hardware node.

i think you need to setup passwordless ssh.Quote:ssh-keygen -t rsa
scp .ssh/id_rsa.pub someuser@hardwarenode:.ssh/authorized_keys

then in php have:Quote:system("ssh -n -F /home/someuser/.ssh/config -i
/home/someuser/.ssh/id_rsa someuser@hardwarenode 'sudo /usr/sbin/vzlist'");
