Subject: Re: PPC support?
Posted by dev on Tue, 28 Mar 2006 23:36:20 GMT

dearaujo,
there should be no much problems running openvz on ppc or any other architercure supported by linux kernel.
AFAIR it took us less than a day to make it working quite fine on x86-64 and ia64, since OpenVZ has quite little arch dependant code.

The problem with ppc is that we just simply have no hardware for it. If you have hardware we will be happy to help you with this task.
