I just upgrade the kernel and below the result

Linux localhost 2.6.18-8.1.15.el5.028stab047.1PAE #1 SMP Tue Oct 23 15:48:28 MSD 2007 i686
i686 i386 GNU/Linux

```
[root@dedicated cache]# cat /proc/self/status
```

Name: cat

State: R (running)

```
[root@dedicated cache]# vzctl create 100 --ostemplate centos-4-i386-default
```

```
Creating VE private area (centos-4-i386-default)
vzquota : (error) Quota on syscall for 100: File exists
vzquota on failed [3]
vzquota : (error) Quota is not running for id 100
Performing postcreate actions
VE private area was created
[root@dedicated cache]# vzctl start 100
Starting VE ...
vzquota : (error) Quota on syscall for 100: File exists
vzquota on failed [3]
```

So i set in file /etc/sysconfig/vz
DISK_QUOTA=no

now the result

```
[root@dedicated cache]# vzctl start 100
Starting VE ...
VE is mounted
Adding IP address(es): 209.250.234.166
Setting CPU units: 1000
Configure meminfo: 49152
File resolv.conf was modified
VE start in progress...
```

Anyway the ip address is needed set to the real ip address or network ip address class ?

Best Regards,
Joko Frank Octo
