Subject: Re: Cannot Start VE - Unable to set capability: Operation not permitted Posted by JFOC on Thu, 15 Nov 2007 07:03:47 GMT View Forum Message <> Reply to Message

Sorry.

The question is how to make the VE is accessible from Internet and the Host node is accessible from VE.

I'm a little confuse with the tutorial in the openvz wiki about VE ip address, the ip address should be a local network class type ip or public ip address ?

Also the nameserver should be set in VE is ISP nameserver or the host node nameserver (since dns server is installed in host node)

Thank you
