Well, I tryed everything.

But I cant get networking of the OpenVZ nodes up.

They have a IP.

I think I did it correct with the networking.

I did do this:

```
iptables -t nat -A POSTROUTING -s 192.168.#NodeNumber#.0 -o eth0 -j SNAT --to  
192.168.42.112
```

192.168.42.112 is the IP I got within this network.

So, what do I do wrong?

Cheers,

Robin

oh and the Nodes IP is:

192.168.#Node Group Number#.#Node Number in Group#
