---

The init script in vzctl-3.0.18 installs the file:

`/etc/cron.d/vz`

as part of its startup, what is strange as that on CentOS5 at least the last mod of the folder `/etc/cron.d` is NOT updated!

What this means its that CRON does not know about the new file as as such does not run it.

Hope this info helps,

Here is a quick patch to fix the prob:

```
--- /etc/init.d/vz_orig    2007-07-31 16:54:05.000000000 -0400
+++ /etc/init.d/vz        2007-11-17 01:56:30.000000000 -0500
