RobinVossen wrote on Wed, 21 November 2007 05:47Ok, damn.. I kinda read over that...
Is there a way to Compile 3.0.18 myself so I can run 3.0.18 instead of 3.0.11? Or will this really
require a Complete new Installation..

Put "deb http://debian.systs.org/ stable openvz" in your sources.list and you will get vzctl 3.0.18
