Subject: VPS Problem -- Users logged in

Posted by ttucholka on Fri, 31 Mar 2006 13:18:55 GMT

With all the VPS's I have, if you login and do a   w   to see who is logged in, it always says there are 0 users logged in -- even if there are 5 users on.

```
07:10:57 up 17:27,  0 users,  load average: 0.00, 0.00, 0.00
USER    TTY    FROM           LOGIN@   IDLE  JCPU  PCPU WHAT
```

any way to fix this to properly display who is logged in?
