Subject: Re: ERROR: No such OS template: install
Posted by maratrus on Sat, 24 Nov 2007 08:05:26 GMT

Hi,

1. Well, I understand that you use http://download.openvz.org/template/precreated/fedora-core-6 -i686-default.tar.gz precreated OS template cache.
2. But I also see that you have installed vztmpl-fedora-core-6-1.2-1 package. Please tell where have you got it?

P.S.
3. By the way, what version of vzpkg and vzyum do you use?
4. Can you please show the output of "uname -m"?

Thak You!
