Subject: Services not starting on boot

Posted by RazorBlue - Dan on Sat, 01 Apr 2006 12:37:51 GMT

Hi,

I have one VPS where for some reason it decided not to start services on a reboot.

I then entered the VPS and ran setup, reselected all of the services, saved and exited, however on next reboot none of the services came up - again.

The VPS used to work perfectly until this happened, any ideas? I've already rebooted the host node.

Dan
