Hello.

well, prebuilt OpenVZ kernels available on [openvz.org](#) are compiled with option "#CONFIG_NTFS_FS is not set", so to `_try_` using NTFS unfortunately you have to recompile the kernel.

i wrote `_try_` because we have not checked it if it works.

P.S. modules can be loaded in Hardware Node only. It does not mean that you can use functionality of the module in HN only, but you must load the module from HN.
