Subject: *SOLVED* No Internet access on VEs (but I get remote SSH access)
Posted by etechship on Sat, 01 Dec 2007 21:22:13 GMT

I have a computer running the OpenVZ live CD (for testing) and I followed the tutorial that popped up, and it all worked. I added the IP address, but when I try to ping google, or run apt-get update from the VE, it errors out. I can ping google form the main NH.
