Dont be sorry i must thank you every time, for your time!

The VE does not ping " outside" world, ip's or hostnames.

The HN does.

The problem stosp when i sysctl -p on HN

I allready sent a copy of syctl and you can check it, i think it has some errors on it...

"You cannot ping other host in your subnet from inside VE?"

No, only localhost"

Thank you very much...
