Subject: Re: live migration with extra mounts in VE
Posted by Andrey Mirkin on Tue, 04 Dec 2007 06:47:23 GMT

Hello!

Can you please scpecify what kernel version you are using?

CPT ERR: df8a3800,120 :-2 mounting /data/ftp ext3 40000000

Flag 0x40000000 is stands for external mount, so it seems that during checkpointing this partition was recognized as external partition (mounted from VE0).

We had a bug in this place, but this bug was fixed long time ago in 028stab040.1 kernel.
