Subject: Quota error when trying to start openvz
Posted by alexanderd on Thu, 06 Apr 2006 07:14:43 GMT

Hi,

I get this problem when trying to start openvz with the vzctl start 1 command,

vzquota : (error) Quota getstat syscall for id 1: Inappropriate ioctl for devicevzquota init failed [3]

So the question is; what does this mean? To me it looks like I havent set quota for my vz, or is this related to anything else?
