Subject: Help disk qouta error
Posted by Info Ishaak on Sun, 09 Dec 2007 00:16:37 GMT

Hello sir,

I have install OpenVZ on a fedora core 6 server with 160GB HDD.
Now I install a VPS but it cannot start it gives error:

Starting VPS ...
vzquota : (error) Quota on syscall for 101: File exists
vzquota on failed [3]When I put quota on off it starts ok.
But I need the quota.

Could you help please..
