Thanks Thorsten. Unfortunately, I am still running into the following problem

On reboot, i get the error msg 'Statrting OpenVZ: failed to load module
vzmon..failed'

I also did a 'sudo apt-get install vzctl vzquota vldump vzctl-ostmpl-debian'
but that did not fix above problem. Also, vzctl-ostmpl-debian could not be
found.

Thanks again for your assistance
Amba
