Subject: Re: port 3754 routing udp & tcp - doesn't work
Posted by Sten on Fri, 14 Dec 2007 14:24:54 GMT

I think the addresses are vice versa
(you want packages that are about to reach HN, ie. their destination is MY_PUBLIC_IP, to be redirected to VE), it should be:
iptables -t nat -A PREROUTING -p tcp -d MY_PUBLIC_IP --dport
 3784 -i eth0 -j DNAT --to-destination 192.168.1.8:3784
