kir wrote on Fri, 21 December 2007 04:27Can you try to do this with some Debian template?

As requested, I used debian-4.0-i386-minimal

Different valid IPs both v4/v6 from the Ubuntu VE

Survey says...........working!

/etc/network/interfaces is line for line (excluding the IPs), exactly the same in both debian-4 and ubuntu-7.10, just that debian-4 works.
