dev wrote on Wed, 19 December 2007 14:18sure, OVZ can run inside any VM.
We have as example Xen kernels for running OpenVZ in Dom0 or DomU

Another question: do you probe to run VirtualBox in OpenVZ VE?
(there is no problem with VE0, but may be we hane one in users VE?)

If that is OK, then OpenVZ can be used as sheduler for VirtualBox machines
