Hi,

You can use as a base system any distr you prefer to use, but commercial Virtuozzo based on RHEL 5 kernel and therefore we must keep in mind that on RHEL based distrs everything must be ok. Nevertheless it is possible to use other distrs.

If you want to use Debian please look at this page
http://wiki.openvz.org/Installation_on_Debian

Please look at <http://debian.systs.org/debian>.
Is it contains updates you need to use?

Thank You!
