Here is the centos-4-i386-bandwidth.tar.gz, I don't know how long the link will be available so grab it while you can.

<http://www.megaupload.com/?d=967KJIH6>

TIP: If you don't want to collect bandwidth usage of certain VPS add this line at the end of bandwidth.sh script. Physical interfaces attached to VPS won't have any bandwidth graphs.

```
rm -f /vz/private/<bandwidth-vps number>/home/bandwidth/vps-<number>.rrd
```
