When I run iostat inside a VPS I just get CPU stats, is it possible to run iostat in a VPS?

```
[root@webmail /]# iostat -x 5
```

```
Linux 2.6.9-023stab044.11-smp (webmail.mydomain.com) 01/04/08
```

```
avg-cpu:  %user   %nice   %sys %iowait  %idle
           6.04    0.00    0.94   0.02  93.00
```

```
Device:  rrqm/s wrqm/s  r/s  w/s  rsec/s wsec/s  kB/s  kB/s avgrq-sz avgqu-sz  await
svctm  %util
```

```
avg-cpu:  %user   %nice   %sys %iowait  %idle
           0.00    0.00    0.00   0.00 100.00
```

```
Device:  rrqm/s wrqm/s  r/s  w/s  rsec/s wsec/s  kB/s  kB/s avgrq-sz avgqu-sz  await
svctm  %util
```
