Subject: Re: Centos 5 - doesn't boot after yum update
Posted by fgomes on Mon, 07 Jan 2008 00:39:07 GMT

The last line I see on the console is this:

input: AT Translated Set 2 keyboard as /class/input/input0

It seems strange that there are no messages in the /var/log/messages for every boot with this kernel

Before this message there are a couple of them that seems like a problem exists, but they also occur when it boots well with a different kernel:

powernow-k8: MP systems not supported by PSB BIOS structure
powernow-k8: MP systems not supported by PSB BIOS structure
powernow-k8: MP systems not supported by PSB BIOS structure
powernow-k8: MP systems not supported by PSB BIOS structure

Please let me know if you need any additional information

Best regards

Fernando
