I'm using gentoo inside openvz and am trying to burn an ISO image using 'growisofs' but keep getting an error: :=(unable to anonymously mmap 33554432: Cannot allocate memory

the output of cat /proc/user_beancounters is:

```
Version: 2.5
       uid  resource                     held              maxheld              barrier                limit              failcnt

```

I am able to burn an image using 'growisofs' in the hostnode without any problems...any thoughts or help would be appreciated.
