
Subject: [patch 4/9] unprivileged mounts: propagate error values from clone_mnt
Posted by [Miklos Szeredi](#) on Tue, 08 Jan 2008 11:35:06 GMT

[View Forum Message](#) <> [Reply to Message](#)

From: Miklos Szeredi <mszeredi@suse.cz>

Allow clone_mnt() to return errors other than ENOMEM. This will be used for returning a different error value when the number of user mounts goes over the limit.

Fix copy_tree() to return EPERM for unbindable mounts.

Don't propagate further from dup_mnt_ns() as that copy_tree() can only fail with -ENOMEM.

Signed-off-by: Miklos Szeredi <mszeredi@suse.cz>
