Subject: RHEL5 template?
Posted by jmelyn on Thu, 10 Jan 2008 14:43:55 GMT

Hi there,

I need to test OpenVZ on one of our servers. So I installed RHEL5 on a HN and installed the vz packages through yum. And vz service is already running .

Now I would like to install an OS template, RHEL5 if possible. But I can't find it. So where is it? Otherwise is it easy to create it?

Thanx in advance for any reply,

Jean-Michel.
