This might be of importance as well, even when just VE101 is started only (it starts ok) the EEXIST message is spitted out in dmesg

VE: 101: stopped

kobject_add failed for net with -EEXIST, don't try to register things with the same name in the same directory.

```
[<c052f593>] kobject_shadow_add+0x113/0x1a0

=====
```

```
kobject_kset_add_dir: kobject_register error: -17
VE: 101: started
```

and I can access internet after
#vzctrl enter 101
