kir wrote on Wed, 21 December 2005 08:04Just create a new partition, mount it to, say, /vz.new and then copy all data from /vz to /vz.new using cp -a.

Then, umount /vz.new, remove everything from /vz and mount new partition to /vz.

Hi there, if right now

Quote:Filesystem Size Used Avail Use% Mounted on
/dev/sda2 221G 28G 183G 13% /
/dev/sda1 965M 42M 874M 5% /boot
tmpfs 1013M 0 1013M 0% /dev/shm

This is what I have, how can I create a partition from an existing mounted partition?
