Subject: Re: Is NFS virtualized fully? Posted by dowdle on Wed, 12 Apr 2006 22:23:30 GMT View Forum Message <> Reply to Message

Ok, I have the desired NFS mounts mounted on the physical host and I want to "bind mount" them inside of a VPS.

Er... how do I go about doing this?

I read the OpenVZ User's Guide and I saw bind mount mentioned a few times but it wasn't really clear.

HELP!
